SUMMARY

Full-Stack Developer with over four years of experience in designing, building, and deploying scalable web applications and platforms. Proficient in React, Next.js, Node.js, NestJS, PostgreSQL, and MongoDB. Demonstrated ability to lead full project lifecycles, integrate third-party APIs, and optimize performance across frontend and backend. Known for delivering under pressure, mentoring teams, and driving product success. Open to remote full-time roles or technical co-founder opportunities.

EXPERIENCE

Antino Labs, Gurugram, Haryana

Senior Software Developer, September, 2024 – Present

- Led the end-to-end implementation of the Offers Dashboard, developing optimized REST APIs and dynamic UIs using ReactJS, PrimeReact, and react-hook-form.
- Built the Rewards UI in Next.js for NeoZAP's mobile app, leveraging SSR, ISR, and Static Generation for high performance and seamless UX.
- Implemented the Spin the Wheel feature using react-custom-roulette, customizing library behaviour and eliminating visual glitches to enhance user experience.

Software Developer, May, 2023 – August 2024

- Led the development of NeoZAP's marketing website (NeoFinity product) using Next.js, Tailwind CSS, Framer Motion, and RTK, replicating Figma designs with pixel precision. Integrated server actions for API handling and added a waitlist feature for user onboarding.
- Integrated multiple payment gateways (Razorpay, Paytm, Cashfree) into NeoZAP's e-commerce flow, enabling smooth checkout and transaction handling.
- Architected and developed a full-featured content management dashboard, including form logic with react-hook-form, custom UI components, and RESTAPI development using Node.js and PostgreSQL.
- Collaborated with the marketing team to integrate Google Analytics, GTAG, and Facebook Pixel, setting up custom event tracking and enabling funnel analysis and campaign insights.
- Integrated WordPress CMS via API for dynamic blog management with SSR and ISR, supporting scalable content publishing.
- Designed and implemented the admin panel for the marketing team to manage campaigns and content without developer dependency – reducing update turnaround time by 50%.
- Contributed to the INeuron LMS platform, building a job application feature using Node.js, MongoDB, Redis, and Express Validator, and participated in backend architecture and feature planning for robust LMS workflows.
- Key Achievements during this period:
 - GEM (Going the Extra Mile) – Twice awarded for exceeding delivery expectations.
 - Best Manager of the Month – Recognized for leading and mentoring high-performing teams.
 - Collared Diamond – Honoured for exceptional delivery in high-pressure environments.
 - Critical Project Retention – Took initiative beyond defined responsibilities to help retain a major client project through timely delivery and leadership involvement.

Associate Software Developer, April, 2022 – May 2023

- Awarded Best Manager, GEM (Going the Extra Mile), and Collared Diamond for outstanding performance, high-pressure delivery, and mentoring new team members.
- Developed Role-Based Access Control (RBAC) and authentication modules for Casha, a Nigerian digital payment platform with a unique community-based (AJIO) model, using NestJS and PostgreSQL.

- Built a feature testing simulator, reducing QA and manual testing time by 80%, and resolved a critical production-blocking bug that enabled a major release.
- Led the backend architecture and team collaboration for Travel Hangouts, a travel planner platform, ensuring scalable API development using Node.js, Express, and MongoDB, while implementing DevOps practices for CI/CD and monitoring.
- Contributed to Jify, an Earned Wage Access platform, by integrating user onboarding and KYC workflows using Serverless Framework, AWS Lambda, and DynamoDB, ensuring scalability and compliance.
- Developed core backend features for Top Faculty, a LinkedIn-like social media app for educational institutions. Implemented payment processing, notification systems, and built APIs using NestJS, PostgreSQL, and Prisma.
- Mentored new joiners by guiding them through best practices, project onboarding, and code reviews, fostering team growth and collaboration.

Startoon Labs, Hyderabad, Telangana

Software Developer, April, 2021 – March, 2022

- Developed a comprehensive product management and inventory management system using Node.js, MongoDB, Express, and EJS for the frontend UI, streamlining internal processes.
- Engineered an invoicing tool that automated invoice generation, reducing manual effort by 60% through the utilization of HTML, JavaScript, and Excel parsing.
- Solely managed the entire software lifecycle, from requirement gathering to deployment of new product features, as the sole engineer in the team.
- Conducted regular maintenance and implemented feature updates on the company website using PHP, JavaScript, and MySQL.
- Designed and implemented a dashboard for product usage and sales analysis, leveraging Node.js, MongoDB, aggregation, and EJS for frontend templating.
- Implemented an easy-to-use UI based dashboard to manage and track product usage, reducing the effort made on tracking product usage by 30%.

SIDE PROJECTS

Foodaholix (JavaScript)

- A restaurant rating app landing page built using React, Gatsby, Tailwind
- Utilized logical rendering to create pages to simulate blog statically without using any CMS

Salarywala (JavaScript)

- Landing page for a HR platform built using Next.js, React, Tailwind
- Designed and implemented the whole landing page from start to finish

Moodle LMS(PHP)

- Managed and maintained the LMS by deploying it on Hostinger VPS.
- Implemented new features like locking module while a student's exam is in progress using php, MySQL. Helped in bringing more clients to the platform

SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, SQL, C/C++, Python

Frontend: React, Next.js, GatsbyJS, Tailwind CSS, Redux Toolkit, PrimeReact, Framer Motion, Antd, ShadCN UI

Backend: Node.js, Expressjs, NestJS, Express.js, REST APIs, Mongoose, TypeORM, NextAuth, Prisma

Database: PostgreSQL, MongoDB, DynamoDB

Tools: Git, GitHub Actions, Docker, Jenkins, Serverless Framework

Other: WordPress API, Razorpay, Paytm, Cashfree, Stripe, Google Analytics, GA4, GTAG, Facebook Pixel

EDUCATION

Indian Institute of Information Technology, Dharwad, Karnataka

Bachelors of Technology in CSE, May, 2021

Relevant Coursework: Data Structures & Algorithms, AWS, C/C++, Operating Systems, Machine Learning, Artificial Intelligence, Data Analysis & Statistics
